Halloween Math Jeopardy

Math review game show, grades 3 to 5.

PREVIEW

What's included

- The editable **Jeopardy-style game** in Google Slides (also opens in PowerPoint): 6 categories x 5 values, 30 question slides with answer slides, a **Daily Double**, and a **Final Question**
- Categories: Add & Subtract, Multiply, Divide, Fractions, Place Value, Word Problems
- A printable **team score sheet** and a **teacher key** with every answer
- Color **and** ink-saver B&W, US Letter **and** A4

How it plays

1. A team picks a category and a dollar value.
2. They answer. Click the answer button to check. Correct wins the value.
3. One cell hides the Daily Double: wager, then double it if correct.
4. After the board, every team wagers on the Final Question. Highest total wins.

What this preview shows: the start and board slides, one question with its answer, the Daily Double and Final Question slides, the score sheet, and the teacher key. The full game has all 30 questions.

A pumpkin patch has 245 pumpkins. Farmer Fang picks 128. How many are left?

Add & Subtract for $100.

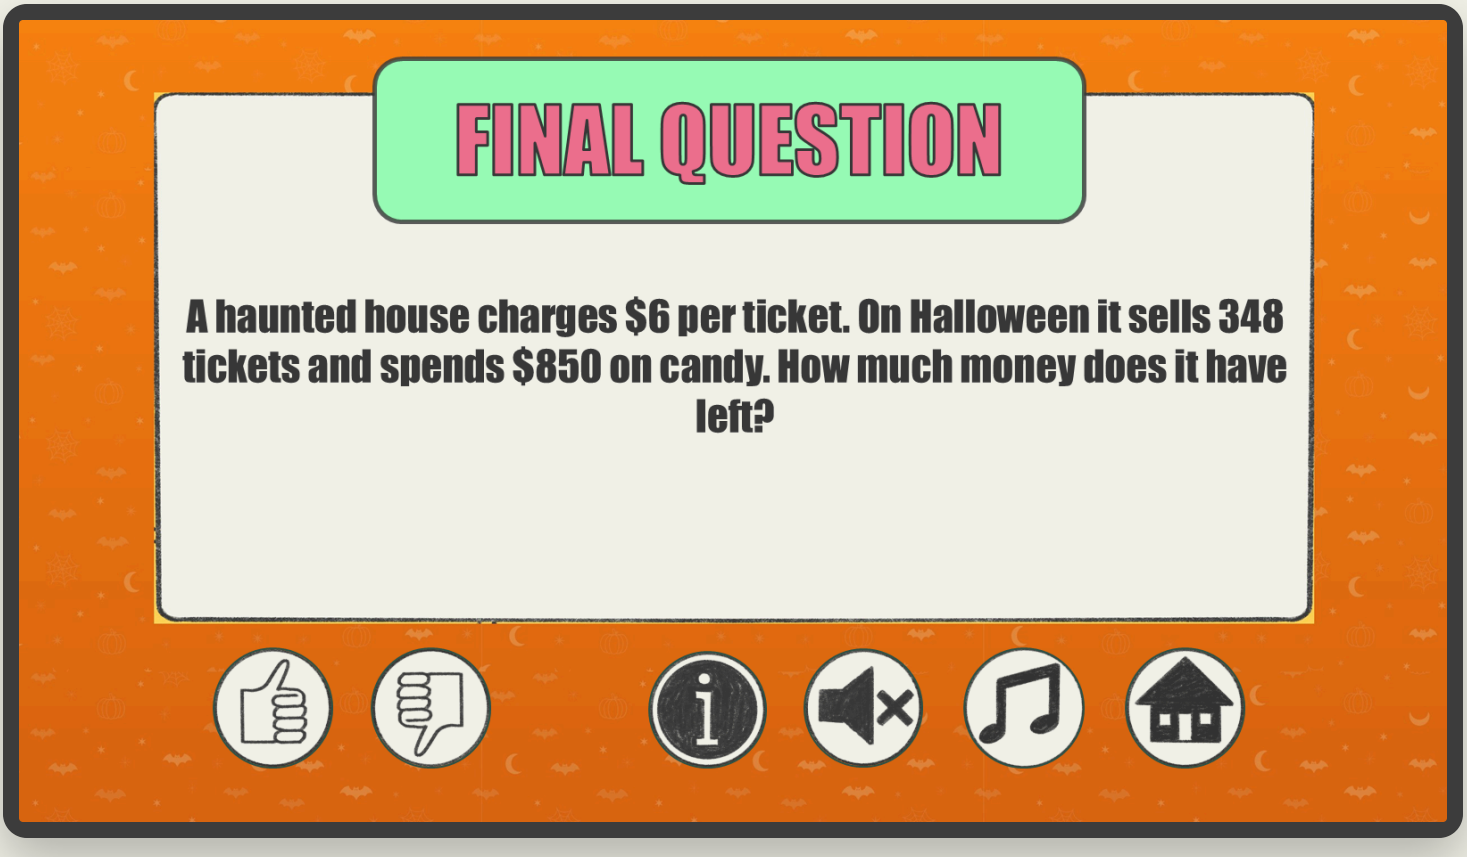

117 pumpkins

Click the answer button to check, then back to the board.

One cell hides the Daily Double: wager, then double it.

Every team wagers on the Final Question.

TEAM SCORE SHEET

Halloween Math Jeopardy. One line per pick: the category, the value, and which team won it.

TEACHER KEY

How to play, and every answer on the board. Keep this page to yourself.

TEACHER PAGE

HOW TO PLAY

1. Split the class into teams. The first team picks a category and a dollar value on the board.
2. Read the question. The team answers, then click the answer button to check.
3. Correct? The team wins the dollar value. Wrong? Another team may steal.
4. The Daily Double hides behind one cell: that team doubles the value if they get it right.
5. After the board is cleared, every team wagers on the Final Question. Highest total wins.

ANSWER GRID

VALUE	ADD & SUBTRACT	MULTIPLY	DIVIDE	FRACTIONS	PLACE VALUE	WORD PROBLEMS
$100	117 pumpkins	56 bags	9 candy corns	5/8	700	$25
$200	843 candies	96 legs	9 rows	1/2	6,345	7:15
$300	217 more tickets	144 pies	33 bags	8/12	9,000	54 square meters
$400	1,125 spell cards	480 costumes	35 bats	5/8	52,381	5 candies each
$500	4,700 + 2,300 = 7,000 bats	1,058 monsters	69 each, 1 left over	3 and 1/4 cups	Three hundred five thousand, sixty-two	37.5 miles (37 and 1/2)

FINAL QUESTION

Q: A haunted house charges $6 per ticket. On Halloween it sells 348 tickets and spends $850 on candy. How much money does it have left?
A: 348 x 6 = $2,088; minus $850 = $1,238

Daily Double: it hides behind Fractions $300. The team that picks it wagers first, then sees the question, and doubles the wager if correct.
Sound buttons (thumbs up, thumbs down, music) work in the PowerPoint version only; Google Slides does not play sounds.

REVIEW • classroomreview.games

In the full game

Project it, split into teams, and review math the game-show way.

30 math questions with answers

6 categories, $100 to $500

1 Daily Double + 1 Final Question

2 printable pages: score sheet + key

Thank you! If this works for your class, a quick review helps other teachers find it, and earns you TpT credits.
