CLASSROOM REVIEW GAMES

MEMORY BOARD GAME

Picture Matching Pairs Kit · Pre-K to Grade 2 · Print, cut, and play

This is a print and cut resource. There are no slides and no editable file.

How the game works

1. Print one board on card stock. There is an optional low-ink card back sheet for the reverse.
2. Cut the cards apart on the dashed lines. Every row on the sheet is one pair, so you can see at a glance that a set is complete.
3. Shuffle and lay every card face down in rows.
4. Take turns turning over two cards. A match? Keep the pair and go again. No match? Turn both back over.
5. Play until every pair is found. Most pairs wins, or just play for fun.

Two kinds of board. On the four picture boards (Animals, Food, School Supplies, Nature) the two cards show the same picture. On the four matching boards the two cards look different but belong together: a clock and its digital time, a small letter and its capital, a pile of coins and its number, a shape and a thing that is that shape.

Youngest players: use 6 pairs instead of the whole board.

Quiet time: one child, one board, as few turns as they can.

Every board has its own frame color, so a mixed pile sorts itself.

Animals board, sheet 1 of 4, in color

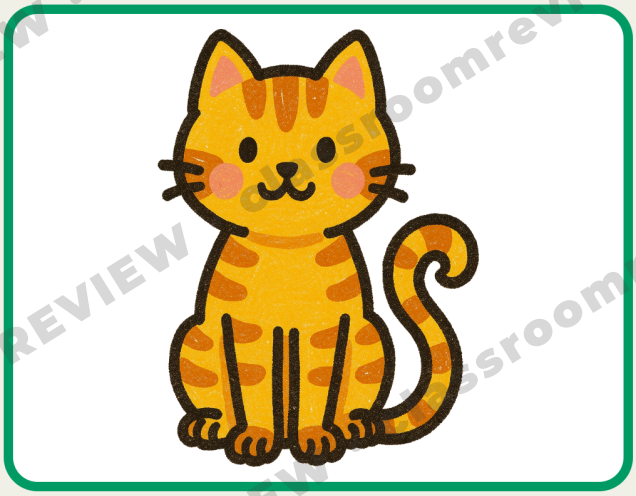

Animals

sheet 1 of 4

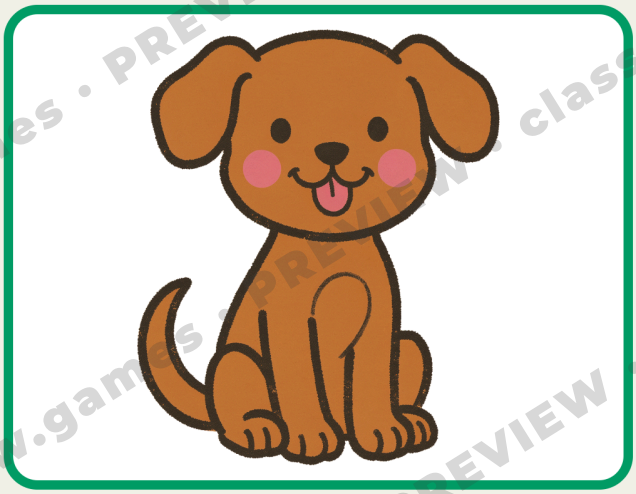

Animals

Each row is one pair. Cut on the dashed lines, then shuffle. 12 pairs across 4 sheets.
